

**TOSI & PARTNERS HIGH TECH LEGAL: Prof. Avv. Emilio TOSI publishes DIGITAL PRIVACY, 21<sup>st</sup> volume of HIGH TECH LAW® series**

*It has been finally published the last work of Prof. Avv. Emilio Tosi, Managing Partner of TOSI & PARTNERS HIGH TECH LEGAL® and Editorial Director of DIRITTO NUOVE TECNOLOGIE® - STUDI GIURIDICI PER L'INNOVAZIONE®.*

*Prof. Tosi states: "Digital privacy could seem a contradiction in terms, a singular legal oxymoron, but it is not.*

*The symbolic date of 25 May 2018 marks the full application of the new complex framework on privacy and personal data protection introduced by 27 April 2016, n. 679 Regulation — better known as General Data Protection Regulation (GDPR) of EU — which has abolished the historical Directive EC 95/46.*

*This relevant legal novelty for personal fundamental rights protection on privacy and personal data protection (art. 2 Italian Constitution and art. 7 and 8 Charter of Fundamental Rights of the European Union) has needed harmonisation with D.Lgs. 10 August 2018, n. 101 — came into force 19<sup>th</sup> September 2018 — of Italian Privacy Code.*

*The GDPR thanks to its intrinsic transnational vocation could be in the complex and liquid context of digital markets a sound global legal benchmark.*

*It's still missing to fulfill the EU Regulation framework the last essential piece of e-privacy regulation draft – which will abolish the directive 2002/58/EC – related to private life and personal data in electronic communications of physical and juridical persons protection".*

*Digital Privacy study collection (Milan, Giuffré, 2019) edited by Emilio TOSI – author also of Chap. 1 and 19, respectively on Digital privacy, person and market and Civil liability for unlawful processing of personal data - is the 21<sup>st</sup> volume of "Diritto delle Nuove Tecnologie" series founded by the selfsame in 2003.*

*The collection will go through themes and issues of digital privacy which require legal analysis and axiological interpretation. Social Network, Cloud Computing, Internet of Things, Smartphone, Smart Cars, Drones, Fintech, Blockchain, Big Data and Artificial Intelligence are only some of principal fearful socio-economic and technological variables which demand to be ruled in a balanced way, equalizing opposing interests.*

*The volume is focused on the study of these fundamental themes for person and business protection, it begins with the Introduction by Prof. Avv. Emilio Tosi, the Preface by Antonello SORO President of Italian Data Protection Authority and it ends with the Afterword by Giovanni BUTTARELLI European Data Protection Supervisor EU.*
